

Novade Safety

Enterprise App to Manage Safety on Construction Sites

Enforce Safety Processes & Compliance On-Site

- **Sub-contractors** can submit data from mobile devices and are notified when actions or the validation of actions is required.
- **Safety officers** can conduct safety inspections and validate PTWs instantly. Corrective actions are easy to check and monitor.
- **Site managers** can monitor the status of all PTWs and NCRs in real time.

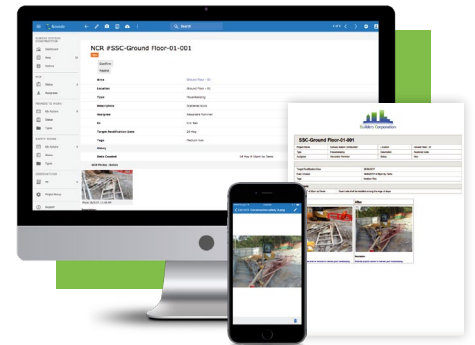

Permits to Work

- **Digital forms** for permit to work (PTW) such as hot work, lifting, work at height, etc.
- **Customize** workflows for each PTW.
- **Submit, review and approve** PTWs directly from your mobile.
- **Sign off** digitally on forms.
- **Monitor** the status of all PTWs in real time.
- **Archive** PDFs for easy retrieval automatically.

Safety Inspections

- **Lodge** non-conformities during inspections: select standard description, take picture, annotate the picture.
- **Assign** corrective actions on the spot with starting data, completion and level of severity.
- **Monitor** corrective actions.
- **Confirm** completion of corrective actions and get acknowledgment with digital signature.
- **Generate** reports automatically.

Analyse Incident Reports & Near-Misses

- **Customize** Digital forms to match your Incident, Accident or Near Miss reports.
- **Input information** in the field from mobile devices: hazard, hazard source, root cause.
- **Review** information: Identify corrective and preventive actions.
- **Conducts analytics:** frequency, most common sources, and their correlations.

Boost Productivity

Real-time access to information on mobile devices and automatic generation of reports.

Ensure Compliance

Rule-based system ensures rigorous enforcement and control on key processes.

Improve Safety

With the ability to analyse data, teams can assess issues, take corrective actions and ultimately improve safety.
