

# The Novade HSE Management System launches for the Japan construction market, offering fully digitalised safety management capabilities

**TOKYO, 07 APRIL 2021** – Novade, a leading smart field management software developer for the building and construction industry, announces the launch of Novade HSE Management System for the Japanese market. Accessible on desktop, tablet and mobile, the all-in-one HSE software will enable construction companies to fully digitalise health, safety and environment processes across all their worksites.

The Novade HSE Management System digitalises safety processes and offers real-time safety management capabilities. Safety regulators can access digital reports in Excel and PDF formats to facilitate compliance and communication. Safety managers can conduct inspections and easily monitor corrective actions. Sub-contractors and workers can submit data from mobile devices and get notified when actions are required.

The Novade HSE Management System is available in two packages.

## The Basic package includes:

- Digitised HSE-related forms and workflows, with specific configurations between main-contractors and sub-contractors, and the workplace safety documentation required prior to the start of construction
- Automated workers' check-in and check-out management function
- Meeting function to digitise and share information from meetings such as toolbox meetings
- Health management function, which includes temperature recording and reporting capabilities

## The Premier package includes:

- All functions of the Basic package
- Observation, Action, Accident, Meeting functions
- Attendance management and reporting functions

The Novade HSE Management System offers the safety and speed of contactless data capture on job sites. All data is entered on mobile devices and work can continue both online and offline. The information is instantaneously synced in the

cloud. Real-time data is accessible on web dashboards and analytics can be conducted to improve safety performance.

As Novade strengthens its presence in Japan, Hiroki Maruyama, Japan country manager, commented, "Fully digitalising safety processes is the only way to enable real-time visibility and implement swift actions when needed. The Novade HSE Management System offers not only that, but also a systematic approach towards improving productivity and sustaining the safety culture of your company across multiple construction sites."
